

HE 'WEIGHED HUMAN SOUL.'

Dr. Duncan MacDougall, Known for His Experiments, Dies at 54.

HAVERHILL, Mass., Oct. 15, 1907. Dr. Duncan MacDougall, a surgeon known particularly for his experiments in "the weighing of the soul," died at his home here today at the age of 54. Through delicate weighing devices, he calculated the weight of the human soul at between 6 and 8 ounces. In this research which extended through the years, he said he took into account the actual weight of the body immediately before and immediately after death.

He was a contributor of poetry to various magazines.

UNDERGROUNDS THUMP BIBLES AT RIVAL ALIEN IMMORTAL ENTERTAINMENT INDUSTRIES

In God We Trust, and Immortals who fuck with us can rust. Aliens are real, they've been with us since the age to the dinosaurs, and they can leave too, in fact. Africas depopulation and henceforth slavery event, is so riddled with conquest guilt, hate crimes disappear with wunderbars and wonder women. Robin Lynch's rich and famous are now alien saturated communes. Competition ripping eye sockets from obese-city digital neural network communications. What took years to perform a mere century ago, is now achieved tenfold in minutes using large mechanized solutions. People are now subject to new power structures, where "respect", "dignity", "knowledge" and "good health" have replaced traditional common sense monetary solutions. This Earth is ancient, and aliens are here, a little hard to see. They are us.

CAN I LIVE FOREVER IN A CRYONIC FREEZER?!

You can do ANYTHING you want to. You are God's given gift to this Universe. However, Legally frozen people are dead. A person in Japan named Mitsu Taira lived to be 242 years old. During the Tang Dynasty. In the Quran Noah had lived for 950 years. Even if the calendar was lunar or weekly this is an exceptionally long age. Greek "Seres" lived over 300 years. Evidence to immortality is showing.

CARBON TAXES HAVE FAILED :: THE BREATHING EARTH

As the Earth's core spins with the moon's lunar gravitational pull, the geomagnetic field changes in shape. Sometimes the concave magnification makes the moon look closer and sometimes farther away. The heat generated is released as volcanism. The Earth's oceans act as carbon sinks and as ice freezes trapping carbon dioxide, the warming oceans 40,000 mile volcanic rift system releases atmospheric carbon. Trees breathe carbon and convert it to oxygen.

Traditionally the earth has been spreading apart as in pangea. However, as volcanoes stabilize and shrinks a tiny wee bit.

MOVE OVER HORSESHOE, ONTARIO'S TRIADS

Normally these are called LeyLines as they give you lay to the ancient lands. Surveyors have built entire cities in exact locations in hopes that others will help rebuild and relive the past. Before the USA's loss in Vietcong territory, triangles have aligned the Chinese to Bermuda to the Italiana and the MacDonalds. *The Triad* is just another *llad*. Radio Jargon than follows around Animal Cruelty, Bed Wetting, and Fire Starting. The theory goes: Crapping the bed is a defiant attempt to free oneself from control. Firestarting symbolizes that control has been lost. Animal cruelty is a look into the past.

The Ponderosa may have been a rose pond. A beautiful place to feel great. Did the ancient peoples cross vampires or was the ponderosa a steak through the heart? I do not know srs. This triangle blows me away. To the right, families gather together and get naked, all day long. Similar to some happenings in NY's nudist colonies. Some cultures worship wales, and

Ten-year-old children with mental retardation (an intelligence quotient of 70 or less) were identified in 1985-1987 from multiple sources in the metropolitan Atlanta, Georgia, area. Children of teenaged mothers were not at increased risk for either form of retardation and children of mothers aged 30 years were not at increased risk for isolated retardation, in comparison with children of mothers aged 20-29 years.

DISAGREEING GHOSTS

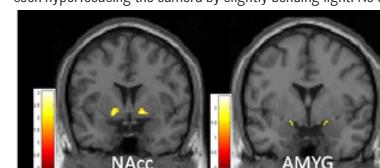

Moving takes effort, and van der waal force consumes energy. The energy expelled from force is sensed in our brains. Sometimes we call it "shock". Fear, Guilt, Apprehension, Shame to name more.

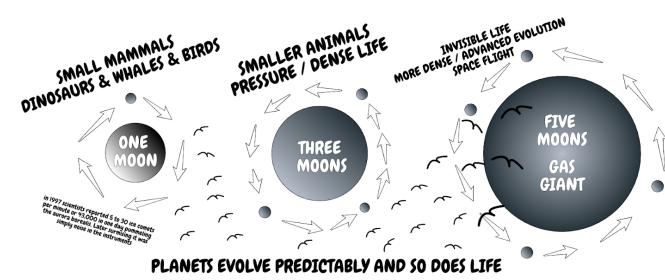

Poltergeists knock tables and chairs everywhere over ringers. This aware lady causes the alien poltergeists to fear for their secrecy and send the panicked person to sleep. Restlessness and the belief that secrecy is important to survival are strong in this video seen by 5,000,000 people. The electromagnetic fields can be seen hyperfocusing the camera by slightly bending light. No one is hurt and a good scare is felt.

PTSD Trauma Controls

THE AMYGDALA is an electromagnetic sensitive region in the brain that reacts to force fields. Some psychopathics people have malfunctioning amygdala. They may approach supernatural situations, such as aliens and poltergeists with little to no response.
